

WIRK WORLD AIMS TO BE THE FIRST ENERGY- POSITIVE DECENTRALIZED AUTONOMOUS ORGANIZATION (DAO)

as a user-focused distributed application (DApp) on Ethereum blockchain empowered by distributed artificial intelligence (AI) agents for education and work.

GLOBAL POVERTY IS A DISASTER!

The poor and unprivileged live without useful support. In 2021 across 109 countries 1.3 billion people live in acute poverty (\$1.90/day poverty rate) watching economic growth and prosperity pass them by.

635 MILLION LIVE IN HOUSEHOLDS IN WHICH NO MEMBER HAS COMPLETED AT LEAST SIX YEARS OF SCHOOL, MUCH LESS ACQUIRED SKILLS NEEDED IN THE NEW AGE OF INFORMATION.

MEANWHILE ...

IN 2021
THE COMBINED MARKET VALUE OF THE WORLD'S
BITCOINS TOTALLED OVER \$1.03 TRILLION.

Ethereum market cap reached over 250 billion U.S. dollars

THE CHALLENGE WE'RE TRYING TO OVERCOME IS THAT WHERE YOU ARE BORN AND THE COUNTRY YOU LIVE—GOOD OR BAD—SHOULD NOT PREVENT YOU FROM PARTICIPATING IN THE GLOBAL GIG ECONOMY AND THE NEW INFORMATION AGE.

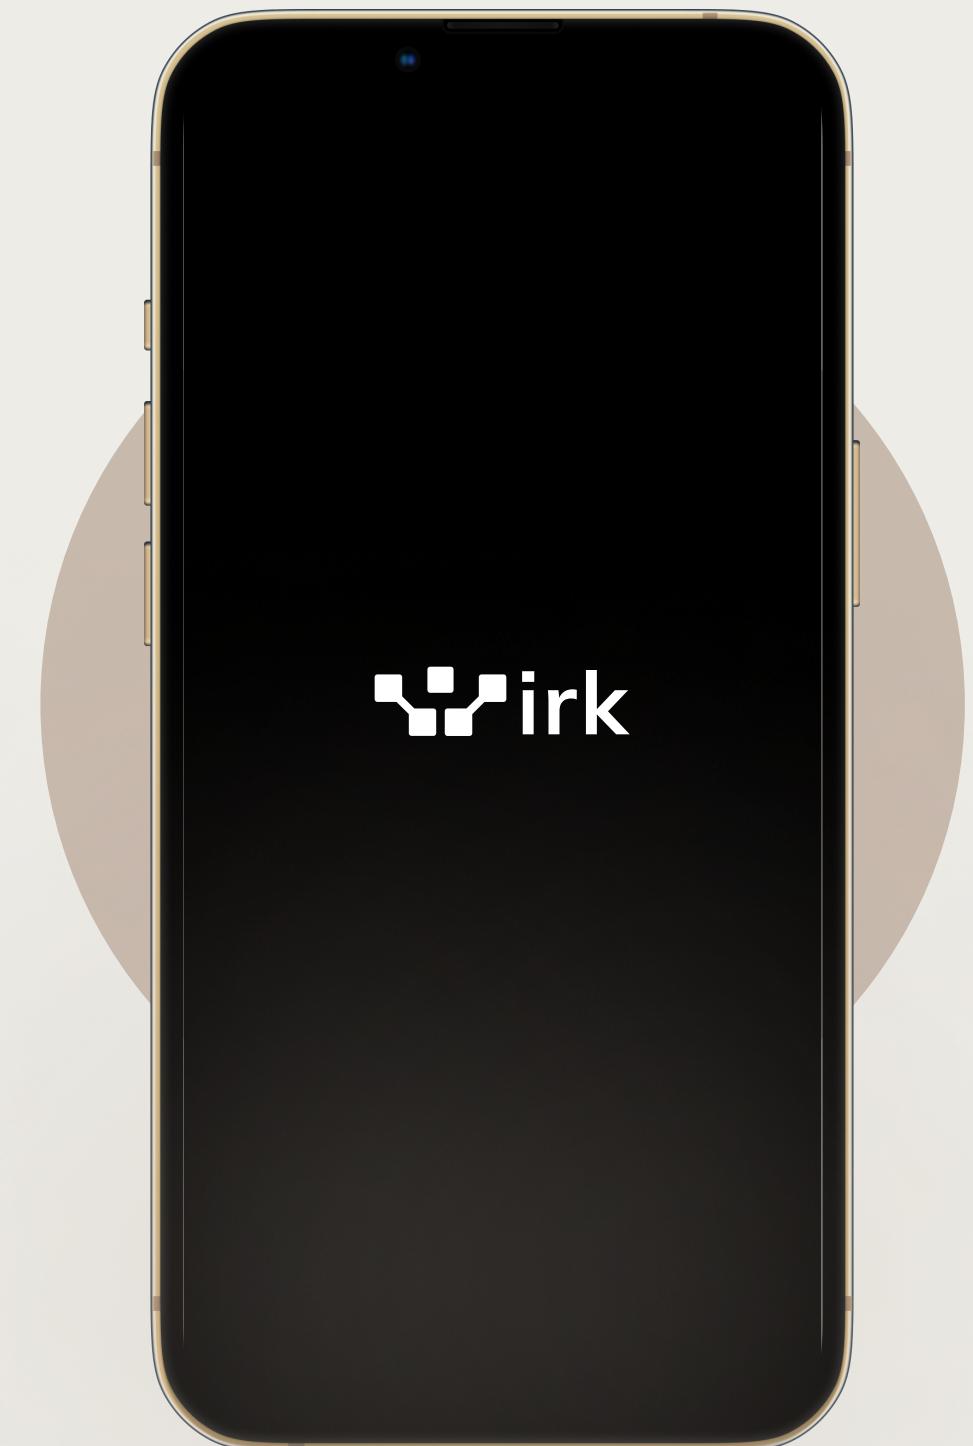

WIRK MISSION

OUR MISSION IS TO DELIVER THE FIRST
SELF- SUSTAINABLE DECENTRALIZED
EDUCATION & WORK ECOSYSTEM
FOR EVERYONE AROUND THE GLOBE

WORK ANYWHERE, FOR ANYONE, AT ANY TIME AND WE TEACH YOU HOW

Wirk Is Applying DAO And AI To Build Global Education Centre Accessible To All

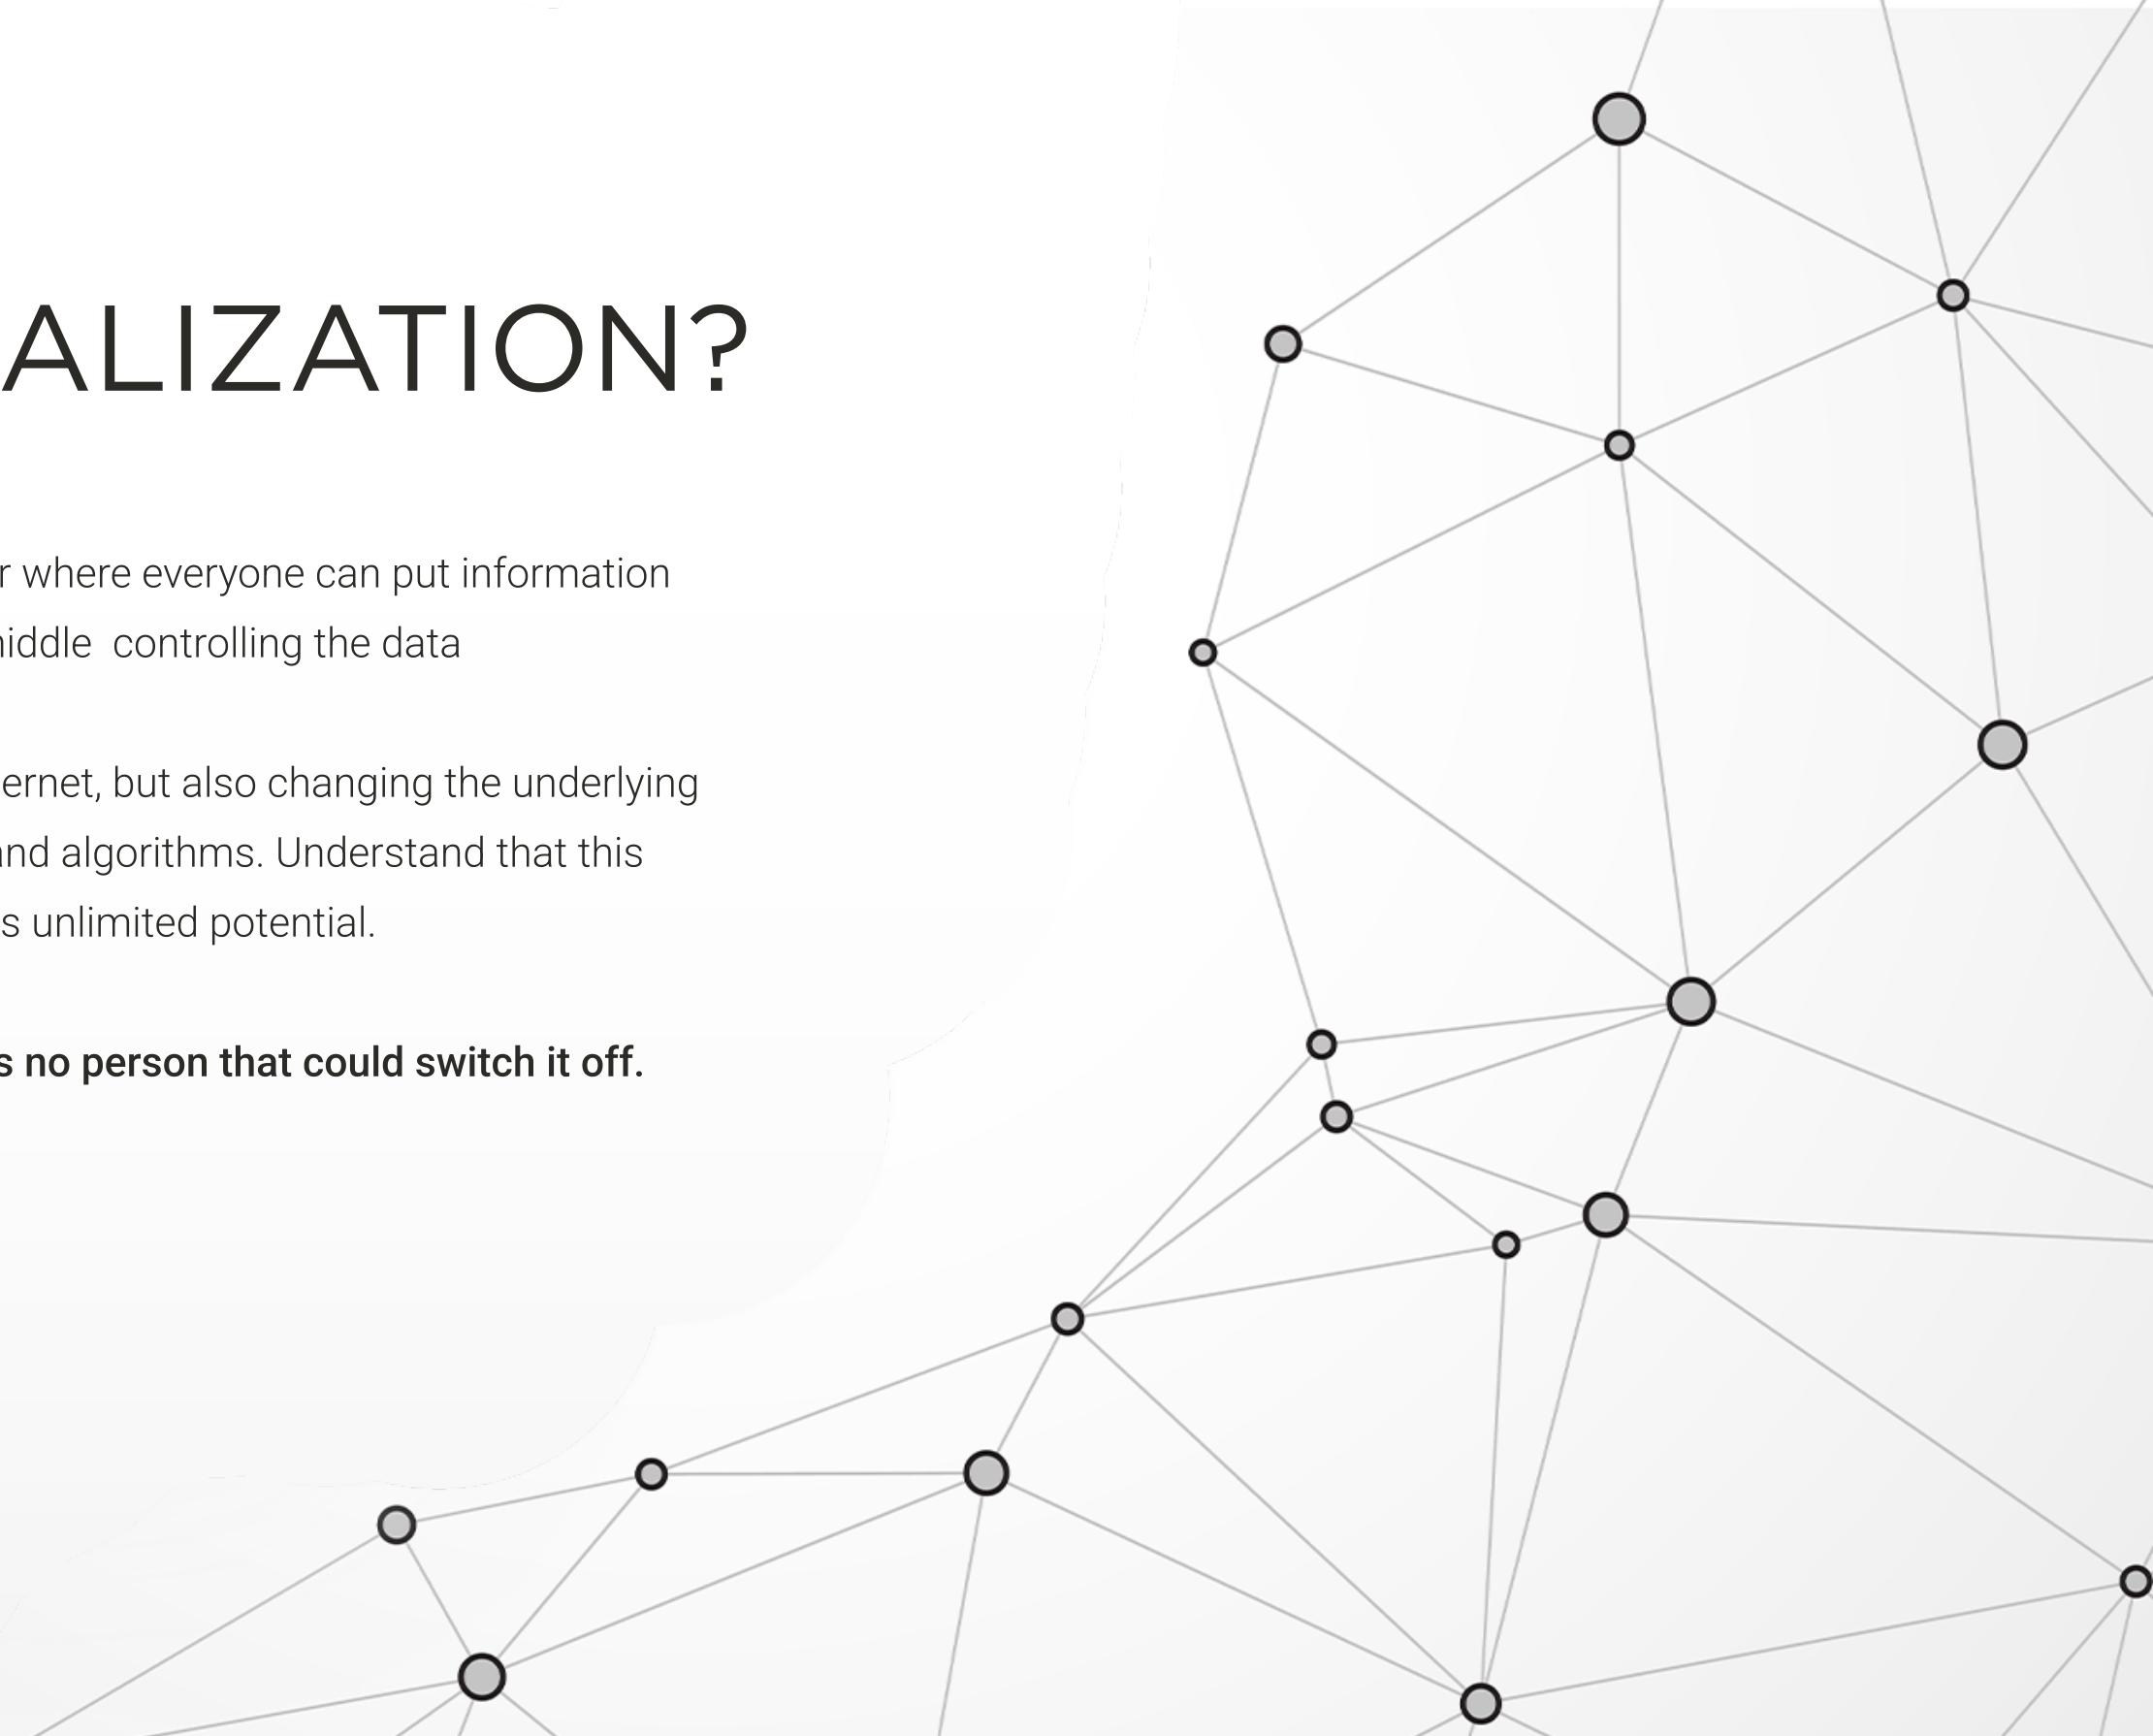

WHY DECENTRALIZATION?

Vision of the Internet is decentralized and peer-to-peer where everyone can put information online, rather than centralized with third party in the middle controlling the data

Blockchain and Web3 are not only re-inventing the Internet, but also changing the underlying models of computation, redesigning data structures and algorithms. Understand that this technology is very early on in its developments but has unlimited potential.

For example, Bitcoin has no central authority, there is no person that could switch it off.

SELF- SUSTAINING EDUCATION HUB WHERE ANY PERSON COULD ACCESS EDUCATION FOR ANY SKILL, LIKE GOOGLE SEARCH ONLY IN MUCH FUTURISTIC AND HELPFUL WAY.

Education will be open, transparent, and capable of modification through member consensus protocols made possible by the Ethereum blockchain.

OUR WORLD OF WORK IS SEEMINGLY IN CRISIS.

Everywhere we look there are bold proclamations about the ways that technologies are expected to destroy, move and deskill jobs.

Many specialists will be replaced

by AI and robots:

- drivers, couriers, traders, assistants, farmers, even lawyers
- Thus, many in the workforce will need retooling to learn new profession or upskill.

The global AI market is to grow to **\$152.24 billion by 2028.**

THE GOAL OF WIRK WORLD

GOAL OF WIRK WORLD IS TO ACHIEVE

1. Total Decentralization
2. Self-Organization
3. Self-Sustainability
4. Free Education
5. Skilled Work
6. Accessible To All
7. Managed By AI
8. Forever Evolving
9. Unstoppable Like Ethereum

WIRK THE WORLD

THE WIRK PLATFORM HAS BEEN DESIGNED TO BE THE BRIDGE PEOPLE CAN TAKE TO NEW JOBS IN THESE RAPIDLY CHANGING TIMES.

Under the guidance of Wirk smart agents, users can fill gaps in their education and skill up. Smart agents then matches users with Wirk smart contracts according to their innate abilities and newfound skills.

The Wirk Life Cycle processes are handled autonomously through data-driven and AI-powered system of personal agents providing each user with the best, personalized experience.

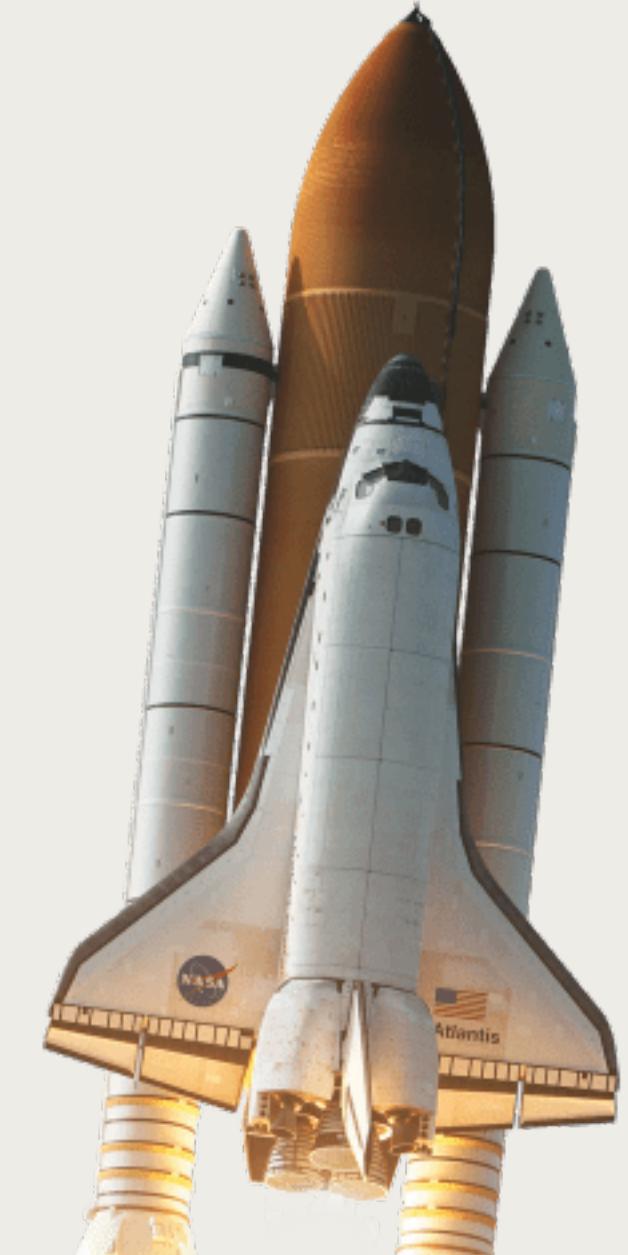

WIRK NOVELTIES

WIRK PROPOSES A NOVEL APPROACH TO FORMAL VERIFICATION USING PROBABILISTIC GRAPH MODELS AND METHODS THAT WILL ENABLE TRULY SMART CONTRACTS WITH:

- ✓ Verifiable performability
- ✓ Correct performance
- ✓ Transactions with minimal consumption of Ether
- ✓ Quality of service in an unforeseen events, including faults and failures

This model-based engineering framework has been used successful, developed and applied over 33 years by the Wirk Co-founder and Chief AI Engineer, Dr. Jones

The IP to do this would also be novel and valuable in this blockchain problem domain and is discussed in detail in our white paper

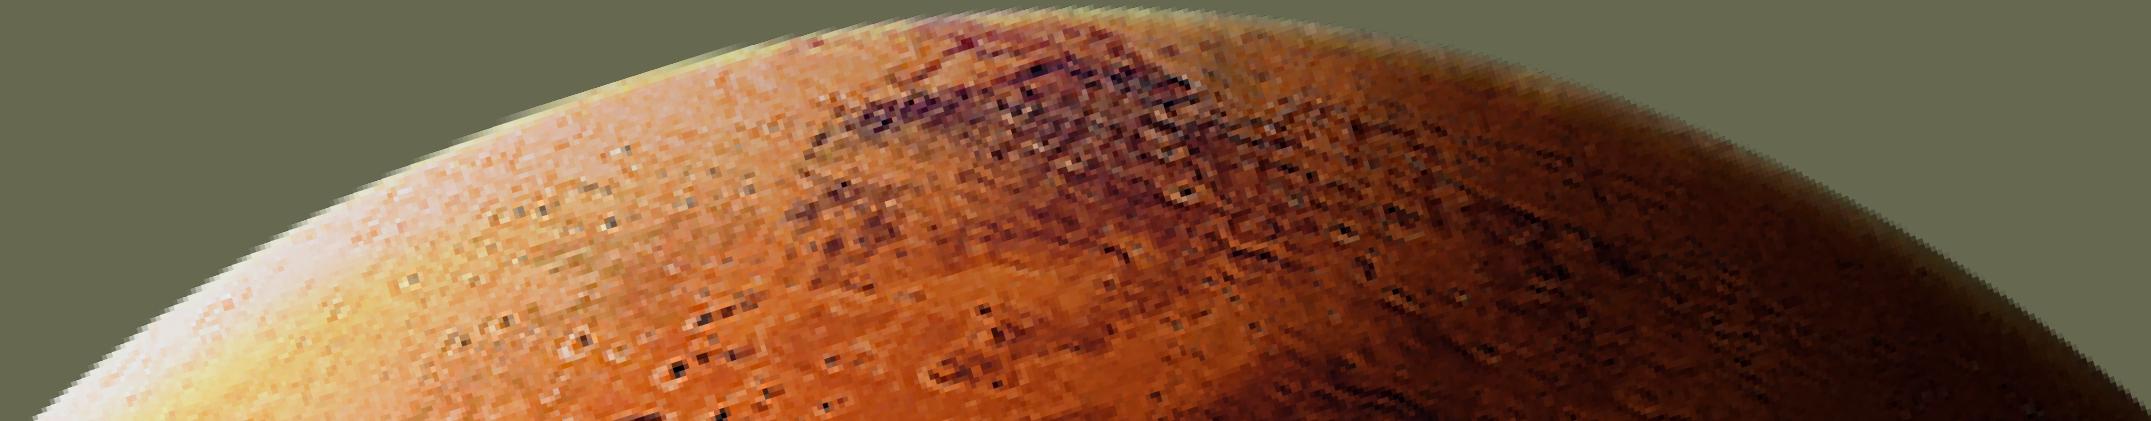

WIRK GAS

LAUNCHING SMART CONTRACTS EMPOWERED BY AI
AGENTS ON THE ETHEREUM VIRTUAL MACHINE (EVM)
OVER THOUSANDS OF NODES TAKES A LOT OF GAS.

HOW DO WE GET CHEAPER FUEL?

WE INCLUDE IN THE MIX FUNGIBLE TOKENIZED ASSET BIOMASS POWER OFFERS A COMPLETE CIRCULAR PROCESS POSSIBLE BY MARS CHALLENGES THAT CONVERTS BIO-WASTE INTO HIGH VALUE BIO ENERGY

THIS MAKE FUEL COSTS NEARLY NON EXISTENT AND MAKES WIRK ENERGY POSITIVE.BIO-GAS ENERGY PLANT WILL BE SETUP IN PHASE 2 TO SELL ENERGY AND FULFIL LIQUIDITY POOLS AND BUYBACK W1RK TOKENS.

EQUAL OPPORTUNITY = EQUAL TREATMENT

W1RK TOKENS REPRESENT OUR CORE VALUE TOKEN SYSTEM AND MARKET MECHANISM AT THE HEART OF THE ORGANIZATION THAT REGULATE AND DEFINE IT.

A persons position in the organization is based upon the value they contributed defining status within the community.

Sustainability requires responsibility for the economic, social and ecological impact

W1RK TOKENOMICS

Token Name

W1RK

Standard Network

ERC-20

Decimals

18

Total Supply

7,000,000,000 W1RK

The W1RK ultimate token is our foundational currency that investors, employers, and employees can hold in their wallets, perform transactions on our platform, or exchange for other kinds of currency.

W1RK has 7 billion tokens in total supply locked in treasury for capitalization of W1RK ecosystem. A tradition of foundation to which we feel committed, and we want to carry forward with you.

All income from our ecosystem creation is distributed in meritocratic way according to W1RK token holders. W1RK token embodies various sublime token revenue streams depending on transaction complexity. W1RK is adapting DAO token rights to our token holders, giving all token holders right to vote on the future of W1RK.

INVEST IN W1RK TOKEN

21,000,000

AVAILABLE FOR
PRIVATE SALE

1 + 2 W1RK TOKEN

EQUAL
\$1.00

We honor first investors by tripling their investment.

This means that all investors after ICO will be able to fully operate with W1RK tokens and have double amount locked and vested daily until Wirk reaches full decentralization by 2029.

W1RK PHASES

1\$ = 1 + 2 LOCKED W1RK TOKEN

WE HONOR FIRST INVESTORS BY TRIPLING THEIR INVESTMENT.
THIS MEANS THAT ALL INVESTORS AFTER ICO WILL BE ABLE TO
FULLY OPERATE WITH W1RK TOKENS AND HAVE DOUBLE AMOUNT
LOCKED AND VESTED DAILY UNTIL WIRK REACHES FULL
DECENTRALIZATION BY 2029.

PRIVATE SALE PROTOCOL

DAO AND INITIAL TOKEN SUPPLY IS MANAGED BY A MULTI SIGNATURE WALLET (MW) WITH 63 MILLION W1RK ALLOCATED TOWARDS INVESTORS AND ADDED TO THE DAO.

Upon ICO sale all investors are added to W1RK MW as owners

The policy of transferring funds from the wallet will be changed to X out of X should confirm the transaction

This would mean that all MW owners should agree to start the next phase of system development by unlocking the next pool of tokens

PRIVATE SALE PROTOCOL

UPON W1RK REACHING 1 BILLION ICO

21,000,000 ($\frac{1}{3}$ tokens) will be unlocked immediately

42,000,000 ($\frac{2}{3}$ tokens) will be vested daily over following 72 months until the final phase of decentralization

W1RK token holders will be partially engaged in the governance process of DAO, including decisions regarding moving to Phase 2.

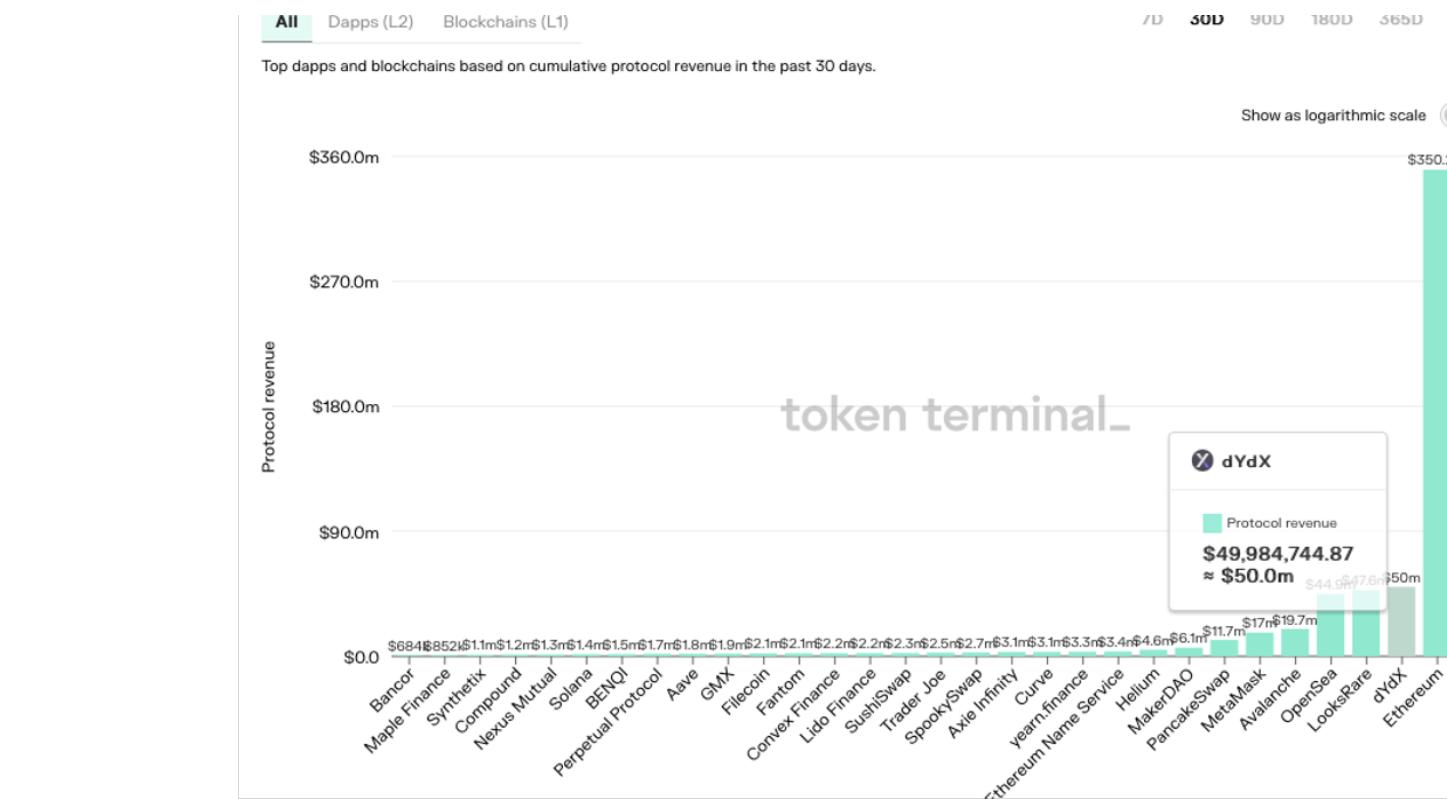

WIRK REVENUE

WIRK ECOSYSTEM REVENUE MODEL

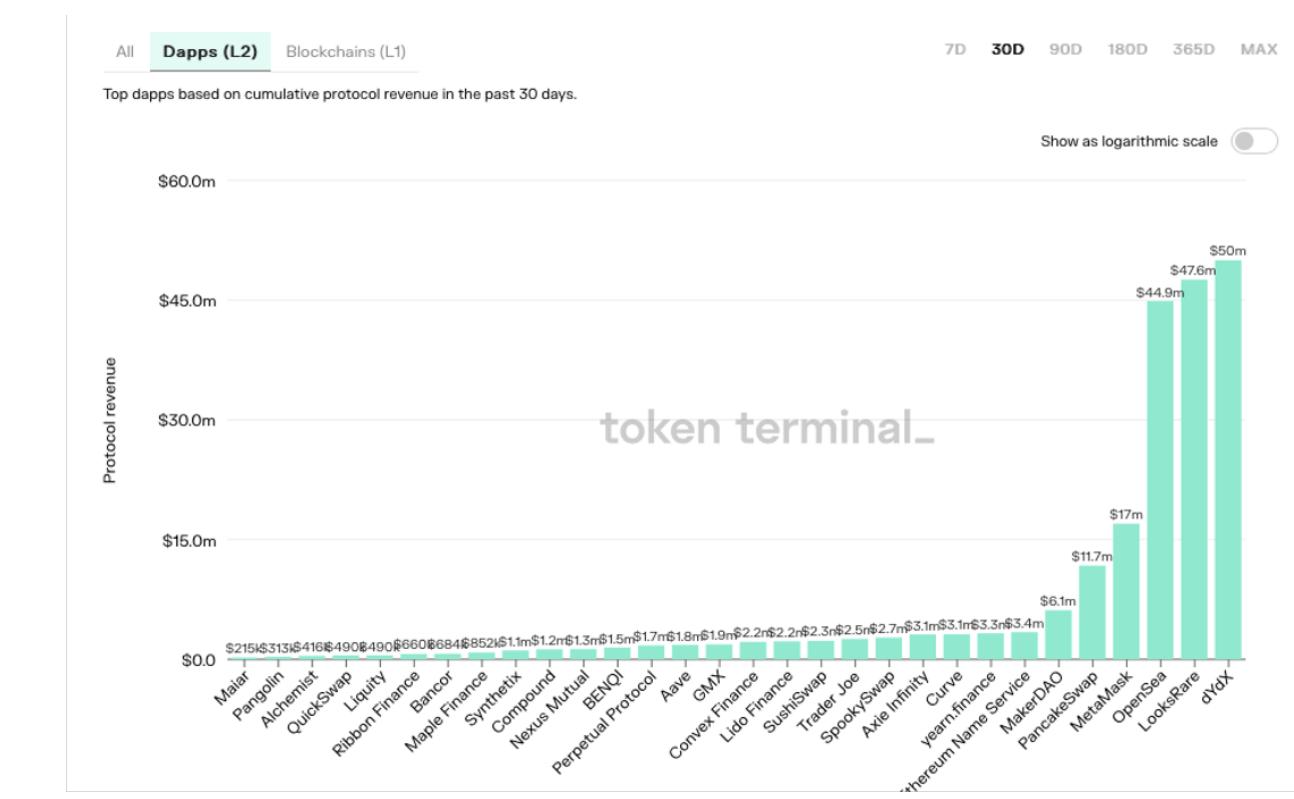

1. Fee-upon-work contract completion implemented in smart contract
2. Fee-upon user exchanging token or using banking tools
3. Bio-gas energy plant will sell energy and fulfil liquidity pools and buyback W1RK tokens

BLOCKCHAIN MONTHLY REVENUE

DAPP MONTHLY REVENUE

https://www.tokenterminal.com/terminal/metrics/protocol_revenue

SOLUTION FOR ALL

BANKING THE UNBANKED

Users are paid through the W1RK cryptocurrency token. Wirk aims to partner with other financial service providers in the world so that W1RK can be easily converted into local fiat currencies or traded on cryptocurrency exchanges, enabling the underbanked to have true access to real-world services, bridging the gap between online and offline economies providing fundamental value to the W1RK token.

OUR TEAM

THE CORE TEAM

FOREWORD BY THE WIRK BOARD OF MANAGEMENT

We are proud of the impressive array of experiences and backed knowledge of the world views, ideas and problem-solving strategies that can be applied on account of the diversity of our future education and workforce.

Our guarantee for sustainable economic success is reliability, sincerity and an open, honest exchange of information.

Our Board members and managers bear a special responsibility in this context we are role models.

We as the managing board – representing each and every employee within our company – one mind and many hands.

FOUNDER & VISIONARY

JANA JUNELE

Founder, visionary and heart of the organization. Meritocratic forward thinker and future driven young female entrepreneur.

Jana's never ending curious spirit and passion for perfection combined with desire to continually redefine limits of what is possible. Ambitious for change on global scale and aiding digital and social transformation for future generations, especially for gig economy. Wirk truly adapts Jana's uniquely luxurious character and the strengths of being a problem-solving genius and collection of all Jana's life experience in one place.

International broad experience and knowledge of business operations, multi-faced business approaches, marketing, sociology, real-estate, fintech and other sectors. Just the right combination to kickstart much needed innovation process in the world.

CO-FOUNDER & CHIEF AI ENGINEER

ROBERT JONES, PHD

Dr. Jones is formally trained in the fields of electrical and computer engineering, computer science, data engineering and science, AI/ML engineering, and software engineering.

For over 33 years, he has held key roles in R&D on some of the most challenging projects in the aerospace, defense, energy, and fintech industries, including 20 years designing spacecraft computer systems for NASA.

Dr. Jones holds a U.S. Patent in AI and has special expertise in AI/ML and adaptive, data-flow algorithms, and embedded system engineering. He also has deep experience in the advanced mathematics, statistics, and theory/application of stochastic process models, solutions, and optimization used in AI and ML.

Dr. Jones is especially adept at deep/optimal learning and data-flow networks, using modern software languages and libraries, and programming frameworks that make the best use of GPU-enabled acceleration for training of neural networks. He is also highly experienced with the unique challenges of applying AI/ML at the Edge on mobile, embedded system devices, and Internet of Things.

SUMMARY

WIRK IS THE EMPLOYMENT AND EDUCATION PLATFORM DESIGNED TO BE ACCESSIBLE BY EVERY PERSON ON EARTH. WE'RE BUILDING A GLOBAL COMMUNITY OF COMPANIES, FINANCIAL INSTITUTIONS AND WORKERS.

Wirk is a responsible member of society and a partner for world. We seek a dialog with all players on future education concepts and on shaping ecologically sustainable decentralized platforms.

THANK YOU

Wirk.World
